Migratory Birds Convention Act

A summary of the Migratory Birds Convention Act is given below. This is the law which is based upon the treaty with the United States. Any enquiries connected with this law may be addressed to the Commissioner National Parks of Canada, Department of the Interior, Ottawa.

OPEN SEASONS

Both dates inclusive.
Saskatchewan: Ducks, Geese and Coots, Sept. 15 to Dec. 31; Wilson's or Jack-snipe, Sept. 15 to Dec. 31.
Alberta: Ducks, Geese and Coots (South of the Clearwater and Athabasca Rivers), Sept. 15th to Dec. 15 Wilson's or Jack-snipe, Sept. 15 to Dec. 14.

CLOSED SEASONS

There is a closed season in the Provinces of Saskatchewan and Alberta on Swans, Wood Duck, Elder Duck, Grebes, Curlew, Willet, Gadwall, Upland Plover, Black-bellied and Golden Plover, Greater and Lesser Yellow legs, Avocets, Dowitchers, Knots, Oyster-catchers, Phalaropes, Stilts, Surf-birds, Turnstones, and all the shore-birds not provided with open season in the above schedule.

There is a closed season throughout the year on the following non-game birds: Auks, Auklets, Bitterns, Fulmars, Gannets, Grebes, Guillemots, Gulls, Hoopes, Jaegers, Loons, Murrets, Petrels, Puffins, Shearwaters and Terns, and there is a closed season throughout the year on the following insectivorous birds: Bobolinks, Catbirds, Chickadees, Cuckoos, Flickers, Flycatchers, Grosbeaks, Hummingbirds, Kinglets, Martins, Meadow larks, Nighthawks or Bobwhites, Nuthatches, Orioles, Robins, Shrikes, Swallows, Swifts, Tanagers, Titmice, Thrushes, Vireos, Waxwings, Whippoorwill, Woodpeckers and Wrens, all other perching birds which feed entirely or chiefly on insects.

No person shall kill, hunt, capture, injure, take or molest migratory birds during the closed season. Sale of these birds is forbidden.

The killing, capturing, taking, inflicting or molesting of migratory insectivorous and migratory non game birds is prohibited. The possession of legally taken migratory game birds is allowed in Alberta until March 31, following the open season, and in Saskatchewan until the last day of February following the open season.

Teaching Staff Complete For Opening Term

The Kitchener public and high schools will open for the Fall term on September 3. The staff as engaged are: A. D. Bierwagen, principal; Miss A. Gillespie; Miss M. Hutchinson; Miss B. Maxwell.

Fuego Well Making Progress

The Fuego well is now down over 2900 feet. The show of gas is increasing, and oil shows are becoming more pronounced. Last Friday week a time shell of about 24 feet was perforated by the drill and since then considerable time is showing in the formation.

Wedding

A large number from town attended the wedding on Tuesday of Mr. Jack Mahura farmer of the north district. The wedding was solemnized at the Catholic church of St. Paul and St. Paul and celebration of the event took place at the home of the groom. The Empress orchestra rendered music for the dance at night. We join in the congratulations of their many friends in wishing the young couple a long and happy married life.

capture, injure, take or molest migratory birds during the closed season. Sale of these birds is forbidden. The killing, capturing, taking, inflicting or molesting of migratory insectivorous and migratory non game birds is prohibited. The possession of legally taken migratory game birds is allowed in Alberta until March 31, following the open season, and in Saskatchewan until the last day of February following the open season.

DAILY BAG LIMITS

Saskatchewan
Ducks and Geese—30 of all kinds in one day, but not exceeding 10 geese, and 200 of all kinds in a season but not in excess of 30 geese; coots, 25; Wilson's snipe, 25.

ALBERTA
Ducks—30 in one day and not more than 60 of all kinds in a season; Geese, 15; Coots, 25; Wilson's snipe, 25.

GUNS AND APPLIANCES
The use of automatic (auto-loading), swivel or machine guns, or battery, or any gun larger than number 10 gauge is prohibited, and the use of any aeroplane, power boat, sail boat or night light, or search light from any land-driven or motor vehicle is prohibited.

NEXT WEEK:
"DIVINE WOMAN"
starring
Greta Garbo
A PASSED "UP" PICTURE
See It! Don't Miss It!
Prices: 50c. and 25c.

News From An Old Friend

A letter received recently from E. J. Lacy contains the following: "Mrs. Lacy and myself left Long Beach, July 30th, in our new 4 door Ford Sedan for a trip to Canada, and met Jasper and his wife, formerly Miss Della Hallman, at Miss B.C. and returned via the Redwood Highway.

We had a wonderful trip with the exception of what might have been a serious accident this side of Roseburg, Ore. In trying to pass a large truck, two of the wheels were crowded off the pavement. Striking soft dirt, the car became unmanageable and turned over on the left side. With the exception of a few cuts and bruises we were unhurt and after a few minor repairs, continued on our way home, arriving Sunday p.m., August 11th.

Congratulations, Jasper. We do not know the date of the happy event, but the 'Express' joins with all old friends in this community in best wishes for a long and happy married life.—Ed.

"The Magic Flame"

A hair-raising battle picture and parachute jump by Vilma Banky clutches the audience at the start of the picture, and holds them through a double murder by Count Count and an amazing rough and tumble fight between Mr. Colman (as Tito, the clown) and the Count, which ends in the death of the latter when he falls a thousand feet from the window of his hotel room into the sea below. As Tito, following the death of the Count, attempts to escape from the hotel in the Count's cloak, he is apparently apprehended by the secret police. Thinking he is facing the gallows, he finds that the old king, has died and that he, the clown, must, to save his life, take the place of the prince who has been killed.

Here on Labor Day

The Richard Kent Stock Co. are presenting on Monday, September 2, at the Empress Theatre, the play entitled, "A Perfect Day"—a dance will be held afterwards, if desired. Admission, \$1 reserved seats on sale at Drug Store; 35c. and 25c.

There are two sides to every question yours and the foolish one.

"It's Time to Re-Tire"

Special Prices for Cash on the following Casings:

30 x 3 1/2 Progress Goodyear tires at 4.00 each
30 x 3 1/2 Pathfinder, Goodyear Tires at 5.50 each
30 x 3 1/2 All-weather Trend Goodyear at 7.50 each
29 x 4 1/2 Gutta Percha, Non-Skid at 9.00 each.
30 x 5 Goodrich, heavy-duty Truck, \$30.00 each
32 x 6 Goodyear All-Weather, Truck, 45.00 each.

N. D. Storey
"The Ford Man"

R.M. Mantario

Minutes of meeting Monday, August 5th, 1929 at Outbush, 10 a.m. Present, Reeve Austin and a full council.

The Council sat as a Court of Revision and the following appeals were heard, those appellants who were present being given precedence as to hearing:

Grant Johnson, NW 21-24-29, w. 3, sustained, reduced to \$1360. NW 14-26-29, w. 3, disallowed, 2 acres taken for road to be defined.
Peter Wilson, Ely 34-26-29, w. 3, disallowed.
Mrs. G. T. Sanderstead, S4 27-25-29, w. 3, sustained, SW reduced to 2200.00, SE \$1740.00.
Mrs. A. C. Mopham, NE 10-24-29, w. 3, reduced to 1670.00.
Mrs. Margaret Hughes, W3 18-24-29, w. 3, reduced to \$2800 on NW. SE 18-24-29, w. 3, reduced to \$2800.00.
Stock Farm, Loan Board, W3 14-24-29, w. 3, disallowed.
N. American Life, NE 1-24-29, w. 3, disallowed.
Mrs. Vera J. Turner, NW 12-25-27, w. 3, reduced to 2300.00.
Walter Teichbold, NW 3-26-27, w. 3, reduced to 2400.00.
W. H. Collier, SW 5-26-27, w. 3, reduced to 2000.00.

R. S. Baker, NE 26-28-29, w. 3, reduced to 4.00 an acre and the remainder of the farm to be raised to \$0 an acre.
Holland Canada Map Co., SE 21 and NE 26-29, w. 3, disallowed, S4 12-27-27, w. 3, disallowed. E4 18-24-29, w. 3, NE reduced to 2000.00, SE to 2000.00, NW 18-24-29, w. 3, reduced to 1000.00, SE 2-25-29, w. 3, reduced to 1000.00, NE 12-24-29, w. 3, reduced to 2100.00, NW 14-27-29, w. 3, reduced to 4.00 an acre.

NW 20-14-29, w. 3, disallowed, E4 6-24-29, w. 3, disallowed, NE 12-24-29, w. 3, disallowed, W3 10-16-29, w. 3, disallowed.
Richard Bay Co., All 8-27-29, w. 3, E4 reduced to 7.00 per acre, SW reduced to 6.00 per acre. NW 26-27-29, w. 3, reduced to 2870.00, SW 26-28-29, w. 3, reduced to 1600.00. SE 8-27-27, w. 3, disallowed. NW 26-28-29, w. 3, disallowed, E4 8-24-29, w. 3, disallowed. E4 8-24-29, w. 3, NE reduced to 19 per acre. NW and SE 24-28-29, w. 3, disallowed, S4 and SE 24-27, w. 3, disallowed.
W. A. Kohan, NW 18-26-28, w. 3, disallowed.

Death of Mrs. J. A. Hamilton

The death of Mrs. J. A. Hamilton, of Cavendish, took place on Thursday, August 22. The funeral was held from Wm. Pullin's Undertaking Parlor. Rev Geo. Shields of the United Church officiated at the services.

Mrs. Hamilton was one of the pioneers of the Empress district, and formerly lived on a farm, a few miles north of town, with her husband and family. Sympathy is expressed with the bereaved members of the family.

Life's Trials

When a carpenter goes out to build a house, he first examines his tools to see that they are in perfect condition. A good workman will not work with damaged tools or with an essential tool missing. The finished result would be imperfect. He would not have his name associated with such.

Are parents as careful as the good workman. So many small children are to begin next month to build the foundation for the future structure of their lives. Are their tools in perfect working order? Eyes and ears, heart and lungs—in fact the whole structure that makes up the little body. Unless they are in perfect working condition, the child starts with a handicap that nothing in later life can overcome. The structure that he builds will be imperfect, and he is not responsible.

—His Parents Are!

No child should start school without a complete physical examination, without having defects, if any, remedied, without being in perfect working condition. That is his birthright.

Literature on the care of children can be had from the Canadian Red Cross Society, 407 Civic Block, Edmonton, Alberta.

Wednesday proved to be one of the hottest and most oppressive days we have experienced this summer.

Mr. and Mrs. Walney Leach, and sons Clifford and Leslie, were visitors of the former's parents, Mr. and Mrs. Thomas Leach, Highland Park, Regina. They attended the Regina Exhibition.

FLY-- AVIATION IS GROWING

The biggest opportunity of the century awaits those who prepare and train now. Be an active student at home, gaining a knowledge of design and construction, navigation, instruments, meteorology, theory of flight, etc. A wonderful course prepared by expert instructors, rates are very low.

'Fresh from the gardens'

What Is a Good Government?

Hon. P. J. Bennett, in addressing a meeting at Stratford, Ontario, recently asked a question, and in answering it, gave a definition of a good government. He said:

"Is it not true that we had a government that would look after the interests of Canadians and Canadians only? You say that is a selfish policy. Ah, my friends, all good governments are selfish and the measure of the goodness of a government is the measure of its selfishness."

Mr. Bennett was, of course, discussing the relative merits of the tariff policies of the Liberal and Conservative parties, and especially so in the light of the impending tariff changes at Washington. These being issues of a partisan character it is not our intention to discuss them, or express any opinion in regard to them. But it is quite in order to analyze and discuss Mr. Bennett's dictum that "all good governments are selfish," and that the measure of the goodness of a government is the measure of its selfishness.

Governments under our democratic system of responsible government are, or should be, a reflection of the people themselves. They are brought into being by the expressed will of the people and are supposed to give expression in legislation and administration to the wishes of the people. Therefore, if a good government is a selfish government, it follows that selfishness is the sign manual of a good people, and that the selfishness of any people is the measure of their goodness. Do the Canadian people believe this? Are they prepared to accept it as true?

Acceptance of this doctrine would be to deny all the teachings of Christianity. It would be to nullify and reject the Golden Rule. It would set up a standard of conduct for nations and peoples that could have but one result—constant warfare.

If the measure of the goodness of a government is the measure of its selfishness, then a "good" government in Manitoba, Saskatchewan, Alberta, or any of the other Provinces, would be one which pursued a policy designed to advance its own interests regardless of the interests and welfare of any other Province, or of the Dominion, or the Empire as a whole. Such a policy would mean endless friction, constant turmoil, the ultimate smothering of Confederation.

Suppose, for example, that rightly, or wrongly, the Western Provinces of Canada insisted that their particular interests demanded the complete removal of all customs tariffs, and they refused absolutely to give any consideration to the views, the interests, the welfare of the Eastern Provinces which believe in customs tariffs. What would be the result?

All government is a matter of compromise. No one group of people, no one community, no one province, can selfishly insist upon acceptance of its views and its policies to the detriment of all other groups, communities and provinces. But if selfishness is to be the measure of a good government, then insistence by each group, or community, or province, upon its own views and policies means that any and all compromise will be impossible, and government itself must fail.

Acceptance of Mr. Bennett's doctrine would condemn the governments of Great Britain for many decades past as the worst governments in the world, because it has been the policy of British governments to adopt policies of unsatisfactory, to assume heavy burdens and accept great responsibilities in behalf of backward peoples and smaller and weaker nations. Great Britain unwillingly entered the war against Germany in defence of the rights and interests of Belgium. Following the war Britain waived all debts owing to her by other allied countries, save, and except an amount sufficient to cover her own indebtedness to the United States. These are but two comparatively recent examples of British policy, but it is being emphasized almost every meeting of the League of Nations. That League, for example, could not exist five minutes if the nations of the world were animated by, and acted upon Mr. Bennett's definition of what constitutes a good government.

The most selfish form of government is an absolute autocracy. How would Mr. Bennett like Premier Mackenzie King to adopt the selfish attitude of Mussolini in Italy, take all powers of government into his own hands, and prohibit all opposition to his policy? Would he like that? Selfishness in government. Is it good? Whatever Mr. Bennett may think, the people of Canada want none of it.

Suggests Powerful

Signals For Vessels

Sea Should Be Better Illuminated

Says French Writer

A well-known French writer has pointed out that ships have been backward in making use of the improvements made in modern electric lighting. He states that, in this modern age of illumination, the sea is the only part of the globe which is plunged into obscurity at nightfall, and recommends that ships should employ powerful signals like the headlights of motor cars. "Undoubtedly the weakness of ships' lighting is a contributory cause of the collisions that occur at night, and the

fuller study of the possibilities of more powerful electric lighting is worthy of the labors of the Conference (the International Conference for the Safety of Life at Sea).

Holstein Bull Goes East

Prize Winner From Strathmore Purchased By Quebec Interest

The Raymond Farm, at Vaudreuil, Quebec, recently purchased a Holstein bull from the Canadian Pacific supply farm at Strathmore. This young bull, Strathmore de Winton, was the champion of the 1924 show at Calgary, Edmonton and Sault Ste. Marie, although defeated at the latter place by his half-brother, Strathmore McKinley Fairchild Wayne.

New Plane Is Climber

British Machine Reaches Four Mile Height in Fourteen Minutes

An all-steel airplane that can climb to a height of four miles in less than 14 minutes is the latest addition to Britain's air fleet. The plane is a single-seater equipped with a super-charger and developing 400 horse power. With a full load of machine guns and ammunition in addition to electrically heated clothing and oxygen breathing apparatus, it can climb to a height of six miles. Its top speed is 185 miles an hour.

The plane is intended to take off from a home defence aerodrome and to climb rapidly to get above enemy raiding machines as soon as information is received that they have crossed the coast.

LIFE WAS A BURDEN

Health Restored Through the Use Of Dr. Williams' Pink Pills

"I am writing to express my gratitude for what Dr. Williams' Pink Pills have done for me," says Dr. W. J. Dowling, Tottenham, Ont., and further says: "I was so badly run down that I felt my life was a burden. The doctor said my trouble was due to poor blood. My medicine did not help me. My face was sallow, my lips blue-tinged and at the last even my heart would palpitate so violently that I would have to stop. My feet were cold, my head would swell and I was so tired that I could not get up. I got a further doctor and he urged by a friend to try Dr. Williams' Pink Pills. I got three boxes, and to my surprise, by the time I had used them I began to feel better. I got a further doctor and he urged by a friend to try Dr. Williams' Pink Pills. I got three boxes, and to my surprise, by the time I had used them I began to feel better. I got a further doctor and he urged by a friend to try Dr. Williams' Pink Pills. I got three boxes, and to my surprise, by the time I had used them I began to feel better."

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail post paid, on receipt of price, 50c. Try them today.

Developing Trade

Increased Travel To The West Indies Follows Inception Of New Service

Since the inception of the new service between Canada and the British West Indies by the R.M.S. Lady Nelson, in December last, the Canadian National steamship's boats have been used to carry an increased amount of trade on every sailing. Traffic from Canada to the West Indies has developed tremendously since the inception of the new Canadian National line, and there has also been an increase of travel from the West Indies into Canada. The increase in the time when attractive rates are given to the West Indies business man an opportunity of going to Canada to study the markets there.

Miller's Worm Powders seldom fail. They rid the system of the worms and expel them from the system. They are complete in themselves, and need no other medicine, but as a highly beneficial medicine they are also correcting the digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

Horses Live In Zoo

The stable of a London horsekeeper is a zoo, the animals shared with the house with the horses. There are 100 horses in the stable and with them, living contentedly, are two Indian monkeys, a wild hare, a vixen, pig, cows, rabbits, canaries and foreign birds.

A pleasant method for children is Mother Graves' Worm Expelling Syrup, which is excellent for driving worms from the system.

Suspects and Birds

A record kept at Montdidier, France, 1784-1869, of dates of arrival of birds and rainfall reveals a marked relationship to sunspot variations according to investigations made at the Dominion Observatory, Ottawa. For instance, the cuckoo on the average arrived two weeks later at sunspot maximum than at minimum.

Corns cause much suffering. Buy Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

Very Considerate

"I just had a 'phone call from Skippy. He's the most considerate boy I ever knew." "What did he have to say?" "He wanted to know if I got home all right from the dance he took me to last night."

Keep Minard's Liniment in the Medicine Chest.

No Unemployment Problem in Iceland

Country Offers Great Opportunities Through Undeveloped Land

Iceland has no unemployment problem, not because folks have to work to keep warm up there, but because Iceland is an undeveloped land of great opportunities.

The unemployed of Reykjavik totaled eight men on May 1. Six of these were more than 60 years of age and in ill health. The other two said they had just left their jobs, and could get better ones.

Iceland, peopled with only 100,000 inhabitants, could comfortably find accommodation and employment for 500,000.

Iceland wants dirt farmers, not men to keep the bright lights of Reykjavik burning. The native Icelanders are good farmers, but not scientific agriculturists.

Government authorities maintain that Iceland could produce far greater quantities of agricultural products than at present, as the soil and climate are excellent for many crops.

An Important Industry

General Public Does Not Realize Value of Canadian Fish

The fishing industry is one that rarely receives much attention from the general public, but it is an important one in the economy of this country, as one realizes in examining the concise items sent out from time to time by the fisheries branch at Ottawa. We catch them all the way from sardines to whales. For example, we sold \$2,071,000 worth of fish, mostly tinned, to Australia in that country's fiscal year, 1927-28. In the first two weeks of May, this year, 20 whales were taken by a company operating from Rose Harbor, B.C. The whales taken off British Columbia are used in production of oil, meat, fertilizer, and are valuable, too, for their whalebone.

Maintains Its Popularity

Canadian Salmon Still Holds First Place As To Money Value

Canadian fish have won a great reputation abroad, a reputation that shows in accumulating orders on an expanding scale. This country's salmon—for years the most valuable export—has been the catch—still maintains its popularity. The fish, which appears to have been the first lure for the hardy European, is one of the long and sleek, next, and the succulent lobster is third place. Sardines are in the swim, too, there have been fine orders from New Zealand and Australia of late years for these tasty fish and the trade in them grows.

The Friend Of All Sufferers... Dr. Thomas' Electric Oil is a valuable remedy for all those who suffer pain. It holds out hope to everyone and is a blessing to all by giving suffering where it is a liniment that is on sale everywhere and can be found wherever required for.

Valley Of A Thousand Falls

The name Valley of a Thousand Falls, in the Mount Robson District, British Columbia, was given by the Rev. G. B. Kinney, who first visited the region with Dr. A. P. Coleman, and participated in his attempt to climb Mount Robson.

Relieves Asthma At Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would realize the remarkable power of Dr. Kelllogg's Asthma Remedy. All cases, chronic and acute, are benefited by this great family remedy. We suffer no experiment with worthless preparations when the genuine Kelllogg's can be purchased everywhere.

Moore Jaw Tourist Camp

Additional facilities are being provided at Moore Jaw Auto Tourist Camp. Last year about 7,000 people used the camp and the present season is expected to witness a considerably increased attendance.

Minard's Liniment for Rheumatism.

Farm Planning

Town planning in Alberta is now being extended to include farm planning. The farmer may secure expert advice concerning the plan for his house and barn, and the layout of his farm.

SHELLERED against HEAT and FRICTION

Just as the stobber waxes his thread to make his clothes hold as long as the shoe lasts, so Firestone saturates with pure liquid rubber, every fibre of every strand that goes into the tire, to make the cords resist internal heat, friction and strain as long as the tire lasts.

This extra patented Firestone process gives Firestone Tires the extra strength and stamina to give "Most Miles Per Dollar."

See your local Firestone Dealer.

Firestone TIRES

Eliminating Level Crossings

Will Take Time But Put For This Purpose Is Available

It is to be recognized that \$200,000 a year will not make for very rapid progress in eliminating the many hundreds of level crossings in Canada, but this fund, known as the railway crossing fund, at least offers opportunity for gradually getting rid of some of the worst of these death traps. Dr. R. J. MacLean, assistant chief commissioner of the Dominion Board of Railway Commissioners, has drawn attention to the existence of this fund and suggests that it be applied in Saskatchewan.

Dr. MacLean has pointed out that the sum of \$200,000 is voted annually by Parliament for the elimination or improvement of railway crossings, and this sum is at the disposal of the Railway Board to distribute as it sees fit. Alberta has recently been granted a considerable amount, and Manitoba has also taken advantage of the fund. Manitoba, in fact, in cooperation with the Railway Board, has done good work in getting rid of some dangerous railway crossings.

This has been done by substituting changes in roads and highways, making it unnecessary to cross railway tracks.

Some day the authorities may undertake to eliminate every level crossing in Canada, but on account of the huge expense that such a move, the time appears a long way off. Meanwhile a good deal has been accomplished by the means outlined, and Dr. MacLean's suggestion ought to be widely considered.—Regina Daily Post.

Canadian Teachers' Federation

1930 Convention Will Be Held At Edmonton

The selection of the venue for the 1930 convention of the organization, the election of the executive committee and the adoption of resolutions comprised the final business transacted at the closing session of the tenth annual conference of the Canadian Teachers' Federation at Quebec.

Edmonton, Alberta, was chosen for next year's conference at a date to be decided later by the executive committee.

The following members were elected to the executive committee of the federation: G. H. Ford, New Westminster, B.C.; A. J. Powell, Fort, Sask.; J. R. Mackay, Saskatoon, Sask.; A. E. Hurd, Winnipeg, Man.; J. E. Robertson, Toronto, Ont.; Miss L. E. Brittain, Montreal, Que.; C. E. Baker, West St. John, N.S.; A. D. Good, Truro, N.S.; and C. B. Jolly, Summerside, P.E.I.

Caution Is Necessary

Motor Drivers Should Use Heads As Well As Horns

"Use your horn! that's what it's there for," is the sound advice of a traffic authority to motorists. He should not to stent up behind the unsuspecting pedestrian or pass another vehicle from the rear without giving some signal. "Get the horn-blowing habit," is his urgent plea. But drivers should also be urged to use their heads, or what are supposed to be heads. Horn-toting should not take the place of caution. A blast of the horn neither entitles the blaster to the right-of-way nor guarantees him a clear path.

Wagon: What's to matter with that egg, boss?

Dinner: It was served too late to be good egg and too soon to be good chicken.

Denied Entrance To States

Young Toronto Inventor Claims He Has More Powerful Substitute For Gasoline

Denied entrance into the United States even for an hour, during which time he had expected to lay his invention before officials of the General Motors Corp., Jack Star, 187 Grace Street, Toronto, claims that he has a lighter and more powerful substitute for gasoline.

Mr. Star is a comparatively recent arrival in Canada, his name is Europe being Jacob Starselski. He is a former racing motorcyclist, and said he had been working on his formula for nine years and had visited Europe, Asia and the continent in search of sources of supply. He carries credentials from Sir Herbert Samuel, British commissioner for Palestine, Mustafa Kemal Pasha and other notables. His researches have involved great expense and long study, he says, and he is working now to obtain world patent for his discovery. He declares he has made arrangements with Frank J. Klazinger, attorney, of Detroit, to assist him. He was denied entry to Detroit, however, for an hour, although he had offered to leave his car with the authorities at the ferry dock.

New Kind Of Festival

Distribution of 100,000 toothbrushes to children in the primary public schools of Chile will be a feature of the "toothbrush festival" to be held throughout the Republic next fall under the auspices of the Chilean Ministry of Education.

The blood absorbs about two pounds of oxygen daily.

It isn't the girl who fires up quickly that makes the best match.

Are You Ready?

When your Children Cry for It

Baby has little upsets at times. But you can prevent them. Then you can do what any experienced nurse would do. Give your baby a few drops of this little bottle of medicine. You would tell you to go—give a few drops of plain Castoria. No second dose. That's the beauty of it; relief is just a matter of moments. Yet you have been told the place of a single doubtful drug: Castoria is safe. So it's no wonder it is so often as an infant has any little pain you cannot put away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Vancouver Man Wins King's Prize In Empire's Marksmanship Honors

Blaisy Camp, England.—With Lieut.-Col. R. M. Blair, of Vancouver, winning the King's prize in an all-Canadian shoot-off, the Canadians finished the great Empire meeting of the National Rifle Association in a blaze of glory. Blair and Lieut. Desmond Burke, of Ottawa, former winner, shot off for the empire's premier marksmanship honor after Burke had displayed wonderful ability at the last stage to tie the Vancouver man. Each finished the regular King's Prize shoot with the scores of 283, out of a possible 300.

A dramatic contest was necessary the next step. With a crowd around them, more excited than they were themselves, Blair and Burke lay down in the centre of the famous Ricklestone range, facing the targets at a thousand yards away. Blair fired first. In turn each Canadian registered a bull's eye and with each shot the intensity grew. When Lieut. Burke hit the inner instead of the bull's eye, scoring four in place of five on his sixth shot, some moments elapsed before the marksmen and the crowd themselves realized the King's prize, \$1,250, and the N.R.A.'s gold medal and badge had been given to Blair by the shot.

Burke was the first to congratulate Blair, the Canadian team-mates of the two marksmen followed, and as the day went on Blair began to receive congratulations from all over Great Britain and Canada. Most notable was a message from the King's private secretary which, addressed to Earl Jellicoe, president of the N.R.A., read as follows:

"The King will be glad if you will express to Lieut. Colonel Blair, His Majesty's hearty congratulations on the winning of the King's Prize." The president and secretary of the Dominion of Canada Rifle Association, His Excellency Viscount Willington, Governor-General and Lieutenant-Governors of the Canadian provinces, all sent cables of congratulations. Lieut.-Col. Blair will also receive an autographed photo of His Majesty, while Burke is getting an autograph of the Prince of Wales.

Lieut.-Col. Blair will return with the Canadian team on the "Duchess of York," sailing August 2.

R. C. Fire Losses Higher

Vancouver.—Fire losses in British Columbia during 1928 amounted to \$2,667,504, against \$2,622,905 in 1927, showing an increase of more than forty-four thousand dollars, according to the annual report of J. A. Thomas, provincial fire marshal.

No Quebec Election

Montreal.—The Quebec government is not contemplating an election this fall. Premier L. A. Taschereau stated in an interview with a local newspaper that election rumors had been circulated here.

Announcement Of Naval Disarmament Terms Coming Soon

London, Eng.—A full statement on naval disarmament negotiations between Great Britain and the United States may be made in the House of Commons before the Parliament rises at the end of July, Premier Ramsay MacDonald announced.

The premier said he was doing his utmost to expedite the negotiations but that he was not certain the statement would be forthcoming. Besides discussing disarmament, the House of Commons heard from the Right Hon. J. R. Clynes, Home Secretary, just why Leon Trotsky, exiled Bolshevik, wasn't permitted to enter England.

Right Hon. Winston Churchill, as energetic and insistent in opposition as he was a leading cabinet minister, fairly prodded the Laborite Premier into a disarmament statement. Premier MacDonald characterized as "a most unworthy suggestion" a question by Churchill whether it was to be understood that "a most great and important decision" was being withheld until parliament has separated. The premier explained that it was obvious the question was not a simple one, and that a very complicated set of cir-

Gift For Baden-Powell

Boy Scout From B.C. Will Present Chief Scout With Indian Head Dress

Montreal.—Among the Boy Scouts from all parts of the Dominion who have left for England, to attend the International Scout Jamoree at Birkenhead, is Robert Gray, an Indian boy from British Columbia. Robert's father is chief of the Wolf Club of Vancouver, and his grand father is chief of his tribe.

The British Columbia Scout is giving his grandfather's Indian head dress to the Old Country, and will make a present of it to the Chief Scout of the world, Sir Robert Baden-Powell.

The head dress is beautifully made, and according to Robert is over a hundred years old and "very valuable."

Will Head New Bank

Hon. Sir Robert Borden Elected President Of Barclay's Bank

Montreal.—The Right Hon. Sir Robert Borden, former prime minister of Canada, was elected president of Barclay's Bank, Canada, at the first meeting of the shareholders held here.

Sir Robert will assume his new duties on September 3, when the bank will commence business. Arthur B. Purvis was elected vice-president, and J. R. Booth was appointed manager.

File Incorporation Papers

Three Montreal Spinners Form Corporation With \$200,000 Capital

Sacramento, Calif.—Three spinners of the Province of Quebec, Canada, have filed articles of incorporation with the Secretary of State Frank C. Jordan. The papers entitle them to engage in any kind of business from manufacturing to publishing newspapers.

The young ladies who legally admit they are spinners, are Misses Jean Doloret, Bertha Cormier and Jessie Dickson.

Expect Larger Apple Crop

Ottawa.—Canada will have a big apple crop this year. The commercial crop is expected to be 11 per cent. greater than last year and 21 per cent. greater than the five-year average with a total of 3,609,417 barrels.

Will Resume Stranded Airman

Ottawa, Ont.—The department of marine has made arrangements to have the Canadian government vessel "Acadia" call at Port Burwell in about ten days and take off the Chicago flyers who are stranded there following the destruction of their plane. The "Acadia" will take the flyers to Fort Churchill.

Left to right are James Stephens, C.P.R. pensioner; and Tom Wilson, discoverer of Lake Louise in the early eighties. The day they are an important part of the local attraction. Mr. Wilson, like Mr. Stephens, will be in the seventies, but both young as the photograph shows.

London-Paris Electric Railway Is Planned

Scheme Would Employ Fifty Thousand Men For Ten Years

London, Eng.—The Observer says that the committee on English channels and communications, which will report late this year, probably will outline plans for an electric railway from London to Paris at an estimated cost of \$600,000,000.

The reported plan calls for a road which it would take 50,000 men ten years to build.

The plan contemplates twin tunnels under the English channel, the observer said, each 23 feet in diameter and 44 miles long. The line would use a railway track on a seven-foot gauge.

Tremendously powerful electric locomotives would be used in the rapid time of 2 hours and 45 minutes, if the plan outlined by the newspaper is carried out.

Churchill Coming To Canada

Former Chancellor Of Exchequer Will Visit Alberta Oil Fields

Calgary, Alta.—Rt. Hon. Winston Churchill, former chancellor of the exchequer of Great Britain and occupant of other important cabinet posts in the Old Country, is en route to Canada for three days in August. He will arrive late on August 24, and will remain until August 27. He will proceed to Banff for a brief visit before going to the coast. This information was received through private sources.

He will visit Turner Valley oil fields and possibly some of the coal areas in the Calgary district.

May Avoid Ontario

United States Tourists Claim About Police Discrimination

Windsor, Ont.—Aroused by complaints of police discrimination in Ontario against United States tourists, the Detroit Automobile Club has sent out a circular of warning to all tourist bureaus on highways leading to Ontario, it was reported by Richard Harris, managing secretary of that organization. The Detroit Club has suggested use of the all-American route to the east so as to avoid Ontario "if the tourists want to be sure of fair treatment," he said.

Four Die In Fire

Corwall, Ont.—Explosion of a coal-oil stove is believed to have caused a fire which swept five residences on Guy Street, East Corwall, causing the death of four persons who were trapped in the burning building and injuring four others. Property loss is estimated at \$25,000 to \$30,000.

Will Rescue Stranded Airman

Ottawa, Ont.—The department of marine has made arrangements to have the Canadian government vessel "Acadia" call at Port Burwell in about ten days and take off the Chicago flyers who are stranded there following the destruction of their plane. The "Acadia" will take the flyers to Fort Churchill.

Poland Honors Aviator

Warsaw, Poland.—The Polish aviator Iskria will bring the body of Major Ludwik Idzowski back to Poland, where honors will be paid. Religious ceremonies have been held throughout Poland in memory of the aviator.

Revisit Scene of Exploits

Left to right are James Stephens, C.P.R. pensioner; and Tom Wilson, discoverer of Lake Louise in the early eighties. The day they are an important part of the local attraction. Mr. Wilson, like Mr. Stephens, will be in the seventies, but both young as the photograph shows.

Canada Wins Kolapore Cup

Eight Marksmen Recapture Famous Trophy Last Year

Bisley Camp, Eng.—Canada won the Imperial Kolapore Cup. Eight marksmen picked from the Canadian Bisley team recaptured the famous trophy Canada lost in 1928, by a margin of 33 points over the Mother Country, with India, Guernsey, and Jersey following in that order.

The Canadian team aggregate was 1,083, while the Mother Country aggregated 1,050. The cup was shot for at three distances, 300, 500, and 600 yards.

Canada had gained a lead of 15 points at 300 yards. At the 500-yard distance their team aggregate had reached 729 points to 703 for the Mother Country.

The standing of the five contesting countries at the 300-yard distance, first of the three ranges, was: Canada, 360; Mother Country, 342; India, 350; Guernsey, 333; Jersey, 325.

Will Represent Canada

Lawrence J. Burpee To Attend Meeting On Pacific Relations To Be Held In Japan

Ottawa.—Lawrence J. Burpee, F.R.C.S., vice-chairman of the Ottawa branch of the Canadian Institute of International Affairs, will be one of the Canadian delegates to the biennial conference of the Institute of Pacific Relations to be held in Japan, commencing on October 28.

It is possible Right Hon. Sir Robert Borden, former premier of Canada and chairman of the Canadian Institute of International Affairs will also attend.

Mr. Burpee will sail from Vancouver on October 17, and plans to spend some time in China before returning to Canada.

Poland Honors Aviator

Warsaw, Poland.—The Polish aviator Iskria will bring the body of Major Ludwik Idzowski back to Poland, where honors will be paid. Religious ceremonies have been held throughout Poland in memory of the aviator.

Report Places Western Wheat Crop At Only 57 Per Cent. of Normal

Endorse Prohibition Act

Prince Edward Island Favors Continuation Of Dry Law

Charlottetown, P.E.I.—The Prohibition Act in Prince Edward Island was decisively endorsed by plebiscite. Balloting was characterized by the same general lack of interest which preceded the plebiscite. All of the returns had not been compiled, but the Prohibition forces were conceded a large majority. Fine weather favored the voting, although the temperature hovered around 84 degrees.

Approximately 17,000 electors cast their ballots, about 60 per cent. of the vote polled in the general provincial election of 1927, when the Conservative Government of J. D. Stewart went to the country with a policy of government control of the sale of liquor, only to be overwhelmingly defeated by the Liberal party of Premier A. C. Saunders, who promised enforcement of the Prohibition Act and a plebiscite in 1929.

Voting in Charlottetown and vicinity resulted in a majority of 218 for government control, the total being 1,417 to 1,198. Only a third of the electorate here went to the polls and the women's vote predominated in many instances. Prohibition is a matter of the people and the people, for all three counties, Kings, Queens, and Prince were reported.

The two questions submitted to the electors were:

1. Are you in favor of the sale of alcoholic liquors under a government control act?
2. Are you in favor of the sale of alcoholic liquors under a government control act?

The result of the plebiscite was awaited with particular interest in Nova Scotia, the only other Canadian province not operating a system of government control. A similar plebiscite will be held in Nova Scotia this year.

Seattle Water Front Fire

Union Pacific Dock Is Completely Destroyed By Flames

Seattle.—In Seattle's biggest water front fire since 1914, the Union Pacific dock was completely destroyed, with damage estimated at \$1,000,000. Six injured firemen were removed from burns and suffocation at the Providence Hospital.

The fire started beneath the flooring on the Bay end of the dock. Apparatus was drawn from twenty stations to fight the blaze, and traffic stalled on business streets while engine and truck companies roared down Seattle's hills to the dock. The city's three fire boats were also called out.

Reviews Boy Scouts

Premier King Addresses Contingent Going To Japan

Ottawa.—Canada's Boy Scouts contingent to the International Jamoree opening at Birkenhead, England, on July 27, was reviewed on Parliament Hill by Premier L. A. MacKenzie King. Later, addressing the Boy Scouts and leaders—representative of every province of the Dominion and the United Territories—in the Hall of Fame, in the parliament building, the Prime Minister made an inspiring appeal to the youth of this country for a full realization of citizenship in this Dominion and in the Empire.

Germany Will Act As Intermediary In Far Eastern Crisis

Berlin.—The German government has agreed to take over the interests of China in Russia, and Russia in China, for the period in which direct diplomatic relations between these countries remain disrupted. It considers the Manchurian question, but emphasized on all sides that this was a certain indication of the administration of the Chinese Eastern Railway.

Requests for its good offices came to the foreign office from Russia through the German ambassador at Moscow, and from China, through the legation of that government here.

The break between Russia and China, the Manchurian situation, has become a diplomatic activity with the German government's agreement to take charge of Russian interests in China and Chinese interests in Russia.

Nanking.—Political notification of Russia's decision to cease relations with China was received at Nanking in a second note from Moscow.

Winnipeg, Man.—Present conditions of the wheat crop in the prairie provinces is only 57 per cent. of normal, according to a statement issued by A. Cairns, statistician of the Canadian Wheat Pool. The statement is based on information received July 18th from Pool telegraphic crop correspondents, each one reporting 100,000 acres.

"The condition of the wheat crop at July 18, by provinces follows: Manitoba, fifty-eight; Saskatchewan, sixty; Alberta, fifty. The corresponding figure at July 11, were seventy, sixty-nine, and fifty-four. All Manitoba points reported severely and deteriorating rapidly. Thirty per cent. of the Saskatchewan points reported sufficient moisture, 75 per cent. reported rain needed, 76 of which reported rain urgently needed as the crops were suffering severely and deteriorating rapidly. Only 17 per cent. of the Alberta points reported sufficient moisture, 85 per cent. reported rain needed, 94 per cent. of which reported rain urgently needed as crops suffering and deteriorating rapidly.

"A serious condition of crops in the northwestern and northern part of the province represented by excessive heat and wind during the last week. Numerous points complained of severe transpiration of moisture from the plants and there is no moisture in the soil to take its critical stage of their development and place."

"The prospects in crop districts six, seven, eight, and nine in Saskatchewan and the northern and north central part of the province representing 37 per cent. of the total wheat area in the province are still little to pool, the condition figures for wheat being 75, 68 and 91 and 93 per cent. of normal, respectively. Prospects in Saskatchewan crop districts one, two, three, four and five, or all southern and the south-east central representing 62 per cent. of the total wheat area of the province, are rapidly deteriorating and many points report virtually a crop failure. Condition figures for wheat in these districts are 66, 43, 41, 68 and 50 per cent. of normal, respectively. There has been a slight improvement during the week in northern Alberta, but central Alberta is still extremely poor and the crops in South Alberta are failing rapidly."

New Departure In Finance

Large New York Bank Saves Small Borrowers From Loan Sharks

When a bank finances a corporation with millions of dollars, that is not news. But when the same bank throws its resources behind John Smith's unpaid doctor bill, that is a new departure in finance. The National City Bank is doing just that, taking care of such bills for working people who are not even depositors, shouldering their financial burdens in a way that is saving thousands from the loan sharks.

In a year, 50,000 persons have received loans from the bank, and 97 per cent. of them have made good on their payments. The loans averaged only \$320 each and were nearly all made to small wage-earners.

Statistics compiled from the first year's experience indicate that the average borrower is thirty-four years of age, has been in the same position steadily for more than five years, earns \$2,750 a year, is married and has one child. He has got behind on his rent, his insurance, his doctor bill, payments or improvements on his house, or some such personal emergency. He needs a little money badly for a short time, and is glad of a chance to borrow at 4 per cent. from a bank, rather than at 10 per cent. and relatives, and to pay it back by small weekly or monthly payments extended over a year.

One of the first applicants for a loan was a man who had, a year before, been compelled to borrow \$1,000 to meet expenses in the connection with the long illness and death of a daughter. He secured this loan from a small loan association of business associates at a prohibitive rate of interest—100 per cent. Able to pay only \$20 a week, at the end of a year he had paid a full \$1,000 but still owed the principal, and was in despair, borrowing \$1,000 from the bank, he was able in 1928 to get free from this debt.

Loans are not made for luxuries. Thirty per cent. of the loans made to date have been for medical, dental and hospital services, 15 per cent. to pay debts, and 11 per cent. to meet payments on homes.

One feature of this loan service that is comforting is that each borrower is insured, without cost to himself, for the full amount of the loan, so that in case of his death neither the co-makers of his note nor his family has to finish the payments due.

Had Curious Experience

English Testimonial Recently Saw Strange Mirage On London Southampton Road

One of the strangest phenomena ever seen on English roads was witnessed by thousands of motorists. For mile after mile extraordinary mirages danced before the eyes of drivers. "Have you seen the mirage?" was the question wherever motorists met. Driving along the main road from Southampton to London between noon and 1 p.m., writes a correspondent, was a curious experience. In the hot sunlight what appeared to be lakes of water lay every few hundred yards, only to fade away as one approached. Traffic took all sorts of fantastic shapes. Some cars followed as though they were travelling in the air.

"Three months ago I caught a fish that weighed 10 pounds. I don't remember just when it was exactly now."

"No, sir. I was telling the exact truth."

"Men who travel a great deal seldom marry," says an explorer. In other words a roving stone gathers no loss.

Thirty-seven miles of carpet were laid on the floor of a modern hotel recently erected.

"You are quite drunk."

"I know I am, but it will soon pass off. But you are a fool and that will not pass off," Hummel, Hamburg.

Rural Nursing

Need For More Hospital Beds, Doctors and Nurses In Isolated Areas

No one orthodox plan of rural health nursing can be laid down and universally accepted as the ideal type of health organization for all non-urban Canada because of the wide difference in conditions found in so vast a land. Miss Elizabeth Stettin, chief superintendent in the Victorian Order of Nurses for Canada, stated in an address on rural nursing from the viewpoint of the public health nurse, at the International Nurses Congress in Montreal. The full co-operation and combined wisdom of provincial governments, directors of training schools for nurses and the leaders in public life were needed to secure the best distribution of available physicians and nurses, she stated.

Miss Stettin's paper on rural nursing in Canada brought out the need for more hospital beds and more doctors and nurses for isolated areas. This must be secured by appropriate appropriations for health purposes, pay adequate salaries," she said, "to cause professional attention for people requiring it but possibly unable to pay for it, or beyond the reach of it."

Other suggestions for the improvement of conditions in rural communities put forward by the speaker were representations by a public health nursing group on the Dominion Council of Health, the continued use of the health unit plan, more full-time visiting and home nursing, and living arrangements for rural nurses.

Leaves Son One Dollar

Chinese Father Resented Neglect During His Old Age

Chinese ethics on filial obligations were the subject of a father's letter, according to Oriental ideas, were cited by Chin Man Duck, formerly of No. 9 Bell Street, New York, when his will was filed for probate in the Supreme Court, New York, in 1928. The testator, "Chin Hing," said the document, "only the small and insignificant sum of \$1 American, because he was unfaithful to me as a son, and neglected me during my old age."

Referring to his other son, Chin Hing, who died in 1920, the testator said: "I am a man of honor and a good loving friend. The father makes him a bequest of \$1,500, which is the residue of the estate, intrusting to his care his wife, Ng Shee, and three other sons, Chin Jung Gu, Chin Jung Ming, and Chin Jung Gwak, all of Chin Far Con, Kwangtung Province, China."

"I know," said the decedent, "that Chin Jung Dot will provide for them faithfully as he had all the pride of his honorable ancestors."

Totem Pole For Rideau Hall

Presented To Lord Willington By Indians At Friendly Cove

Before proceeding to Friendly Cove, Nootka, to remove the totem pole which the Nootka Indians presented last year to His Excellency the Governor General, T. R. Cameron, Canadian National Railways engineer, known throughout Western Canada, as "Totem Pole," Campbell, because of his work of restoring totem poles for future generations of Canadians and visitors to Canada, spent a week-end at Friendly Cove, Lord Willington, who was in the area, he stated in an interview, through his chief, Captain Jack, had presented Lord Willington with a magnificent totem for Rideau Hall, and it was now the engineer's task to transport it and prepare it carefully for its long trip across the Dominion. Friendly Cove was where the famous Captain Cook landed during his voyage along the Pacific Coast.

Canadian Police Forces

The police forces in Canadian cities are of high caliber. There have been comparatively few cases of unfaithfulness to trust recorded in this country. They are men of integrity. They bring to their duties a high sense of responsibility to the public they serve and protect, and it may be added, the character and achievements of any force depend largely on the chief constable. Calgary Daily Herald.

Aerial Photography In 1928

During the 1928 season, 83,000 aerial photographs of areas in different parts of Canada were taken by the Royal Canadian Air Force for the Topographical Survey Department of the Interior. Of these, 17,500 were oblique views and the remainder vertical views.

"This is a heck of a drug-store," we heard a man remark when told by an obliging clerk that they didn't stock lawn-mowers.

New Director

W. J. Blake Wilson, of Vancouver, Vice-President and Director of P. Burns & Co., Ltd., Calgary, who has been appointed a director of the Canada Colonization Association, subsidiary of the Department of Colonization and Development, Canadian Pacific Railway. Mr. Wilson is also a director of the Canadian Pacific and over a dozen other outstanding progressive Canadian organizations.

Dr. Mayo Praises Canadian Brains

Pays Tribute To High Mental Faculty Found In Dominion

Canadian affairs may feel the influence of a billion dollars of American capital, but American affairs feel the influence of \$10,000,000 worth of Canadian brains. Dr. William Mayo, of the Mayo Clinic in Rochester, Minn., said in an interview at Montreal.

The doctor, accompanied by Mrs. Mayo, sailed aboard the "Duchess of Athol," for Manchester, England, to attend a convention of the British Medical Society.

"I can speak for the place Canadians have in the American medical profession," the doctor continued. "At Rochester, 10 per cent. of the American Surgeons' Association is Canadian. In all matters except politics, and particularly in science, the two countries are on a par."

"The boundary line is real as a political demarcation, and this is as it should be."

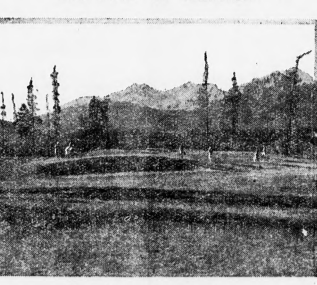

Law and Order In N.W.T.

The maintenance of law and order in the vast regions known as the Northwest Territories of Canada is one of the important branches of the work of the Royal Canadian Mounted Police. The administration of this great area is carried on by the Northwest Territories and Yukon Branch of the Department of the Interior.

Building Active At Calgary

With land sales to the middle of June valued at \$475,000, and with the value of building permits for the same period equal to \$4,129,007, officials were convinced that at the end of the half year period Calgary will have passed the most successful half year, as regards real estate, in its history.

IT'S FULL OF MENACE

No. 12, Teke Janne—165 yards, Par 3.

Many an otherwise fine score has been wrecked by this hole on the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships will be played, August 19-24, this summer. The reason is obvious by study of the green in the upper photo and of the lay-out as shown in detail by the lower panel. Fine fields of golfers are assured for the two big events over this fine course this summer, and the dovetailing of the Western Canada Championship with the Dominion title event, insure plenty of competitive golf for experts and dubs alike.

A Neglected Duty

People Should See That Horses Receive Plenty of Water

The horse is largely being superseded in the streets by the motor wagon and the car, but he still gives service to mankind in large numbers, especially in the smaller cities and towns. But there is one duty to him which is badly neglected and which should be attended to wherever practicable.

That is the provision of drinking accommodation in hot weather. There is a general and deplorable lack of drinking facilities for horses in almost every small city, and this humane provision should be seen to. Humane societies have many calls on their funds in the direction of prevention of cruelty work. A body of public-spirited citizens ought to be found in every community prepared to act if the local authority does not accept drinking fountains for horses as one of its civic obligations.

Falling that drivers should occasionally get a pain of water when they stop for deliveries and offer the horse a drink is the duty of the driver.

That is one of the least, but one of the most necessary, services that man can do for a four-footed servant.

Occupation That Is Dangerous

Sailors On Great Lakes Frequently Battle Heavy Storms

Sitting by the river and lazily watching the Great Lakes freighters sailing past by, the average person does not always think of the hardness and bravery of the men who man the ships. It seems an attractive life to the one who is not a sailor.

But life is not altogether sweet for the sailors of these lakes. Theirs is an existence of danger and trial. Storms at sea are usually associated with ocean liners. Yet tempests bringing heavy rains in their wake frequently whelm the waters of the Great Lakes into seething cauldrons. When that happens, the sailors of the great freighters have their work cut out for them.

Their life instantly becomes a battle for very existence against not only for themselves but for all their comrades on their own ship and often for those on other craft, who have been endangered by damage to their boat.

Invents Egg Saw

Burned fingers and stained clothing will be a thing of the past when every breakfast table is equipped with the saw for boiled eggs recently invented by a chef of Paris. So believes the inventor. The device is round, just fit it over the dome of the hen fruit, squeeze the levers, and the circular saw snips off the dome neatly and quickly.

Band's Famous Springs

The waters of the Sulphur Hot Springs at Banff, in Banff National Park, Alberta, are of great medicinal value and are very similar in composition to the waters at Bath, England.

Two Principal Methods Of Canning

The one-period cold-pack method is so called because the uncooked or partly cooked food is packed into a jar, and covered with some liquid, such as syrup or water, and both the jar and its contents are heated simultaneously by boiling water or steam. This method may be used for all fruits and vegetables, and is recommended for home use. It is a very simple process and completely sterilizes inasmuch as the product is exposed to any bacteria from the air and other outside sources is rendered impossible. The appearance of the finished product is superior as each berry or slice remains intact. There is no crushing. The flavor, color and texture are more natural.

Another method, described in Bulletin No. 77 "Preserving Fruits and Vegetables in the Home," obtainable from the Publications Branch of the Department of Agriculture, at Ottawa, is the fractional or intermittent method, which involves the carrying on of the sterilization for three successive days. This is used in the case of vegetables which are not strictly acid, and especially applies to those desirable for those vegetables lacking acid, such as peas, corn and beans.

It is more thorough as regards sterilization than the one-period process owing to the fact that, as soon, which may develop after the sterilization, so the successive periods of sterilization, but the intermittent sterilization involves considerably more handling than is necessary in the one-day method, also more fuel is consumed.

The Chinchilla Rabbit

Standard Of Registration Is Set By Canadian Small Breeds Association

Of the many breeds of rabbit that are bred for their fur, the chinchilla is perhaps the most valuable. According to Bulletin No. 28 of the Department of Agriculture, at Ottawa, on "Rabbits," the chinchilla originated in France about fifteen years ago. Since then it has spread to Great Britain, the United States, Canada, and many other countries. The standard of registration set up for the fancy chinchilla by the Canadian Small Breeds Association gives the color as a sealable of slate blue at the base, intermediate portion, pearl grey, merging into dark grey and black, then white, and finally tipped with black. The weight is 6 to 7 pounds for does, and 5 to 6 for bucks. Other qualifications are described in the pamphlet, which treats of housing, feeding, breeding, and marketing the carcasses and skins.

Serves No Good Purpose

Nothing In Particular To Be Gained By Trans-Atlantic Flight

No one has yet been able to explain what good purpose there is in trans-Atlantic flights. There is nothing new in the idea. The trip has been made by a number of pilots and lighter-than-air machines. Every successful pilot reports a grueling experience with the chances all against success, all the way. No government regulation, of course, can stop such flights. If aviators would be aviators want to keep on taking chances, there is probably nothing that officialdom can do about it. Border City Star.

No Argument

The Labor hater at a Postings Liberal meeting was very persistent.

"You say you are a Laborer because your great-grandfather, grandfather and father were Liberals?" he asked the candidate. "Then, if your great-grandfather, your grandfather and your father were fools, what would you be?"

"Laborer" murmured the candidate sweetly.

And silence reigned.

Japan's Big Problem

Japan, with a larger population than the British Isles, has a much larger number of landless people to be cultivated. Consequently, she is having difficulty in feeding her people. She imports ten to twenty million bushels of rice yearly.

Mrs. MacTavish: Sandy, there's a company at the door.

Mrs. MacTavish: Quick! Grab a toothpick!

The name Dixie is derived from the Mason and Dixon line.

Huge Seaplane Is a Marvel

German Aircraft Has Kept Construction a Close Secret

The largest flying machine ever built—a mighty 12 motor seaplane—was put on exhibition at Friedrichshafen, preparatory to test flights which may herald an amazing new step in the progress of aviation. It is built to carry 112 passengers.

The seaplane was built secretly at the Dornier works on the shores of Lake Constance, and rumors of the great size and power only recently reached the public.

The craft has three decks and 12 motors. Each engine is capable of 100 horsepower.

The plane itself is approximately 150 feet long with a wing span still greater—about 160 feet.

The builder of the craft claims it will develop a maximum speed of 165 miles per hour and a normal cruising speed of 115 miles per hour.

The plane has quarters for 100 passengers and a crew of 12 men. In addition there is fuel capacity for a flight of about 625 miles with a 50 per cent. reserve fuel having made the maximum cruising range almost 600 miles.

The lower deck of the big plane has baggage and sleeping quarters for the crew. The middle deck is for the well-fitted passenger cabins and a luxurious dining room.

The engine and radio rooms and the pilot's quarters are on the upper deck, 165 feet above the sea level. The motors of the plane will be controlled indirectly from the pilot's room.

The plane has been under construction for many months, the Dornier Company having kept its work secret in order to make the craft as nearly perfect as possible.

Plans For Trees

Value Of Trees Cannot Be Reckoned In Dollars and Cents

The value of a tree was recently made known by an eminent entomologist, who reports that 50 fair-sized oaks were recently sold at \$5,000 prices, and that many are worth \$10,000 each. A tree not only has a cash value, but it also possesses a value that cannot be reckoned in dollars and cents. It is a very simple matter to plant a tree and it is equally simple to foster its growth. If very properly owned, made it a point to plant a tree on available space and refrained from the ruthless destruction of those already well grown, such would be done towards eliminating the follies of promiscuous and thoughtless destruction. (Kitchener Daily Record.)

Indians Are Exempt

From Motor Laws

Vancouver Island Bored Of Trade Discover Lame Situation

There are no responsibilities to crane the style of the carcerous Indian when he is driving an automobile. It was learned from a resolution down for discussion on the agenda of the Associated Boards of Trade of Vancouver Island, in convention there.

The Indian is not legally responsible for any danger he might do while driving, so the Malahat Board of Trade suggests the attorney-general be asked to introduce legislation making it compulsory for Indians to take out third-party insurance policies.

Just Another Cat

She was looking her terror for a run in the park and met her dearest enemy, who was wearing a wonderful new fur coat.

The little dog jumped up to greet the weaver, who cried, "Down! Down!" in an angry voice.

"Forgive my pet, darling," said his owner. "I can't teach him not to chase cats."

Guest (to waiter)—I've lost a half dollar somewhere on the floor. If you see it you may give it to me; otherwise, you may keep it yourself.

"What are you doing here?"

"Is there any man in your waiting for my 'bat'?" Hummel, Hamburg.

"You are quite drunk."

"I know I am, but it will soon pass off. But you are a fool and that will not pass off," Hummel, Hamburg.

Building of Bay Line May Be But Start of Railway Development in Rich Mineral Districts of North

The golden spike that will be driven next month in commemoration of the completion of the Hudson Bay Railway inspires a vision of future possibilities in the development of the Canadian National Railway, in an article in the Saturday Evening Post. He paints a picture of contrasts. He looks back upon the setbacks:

"For years the line lay uncompleted, eroding, its roadbed sunk deep in places that the rails jotted forth like steel tentacles. Men have fought blizzards, loneliness, the rigors of sub-Arctic winter to complete it, that there may be a new outlet to Europe, entailing a shorter rail haul, and, strangely enough, a shorter ocean voyage than from any other port on the continent. It is a land of Eskimos and pioneers now."

But what does Sir Henry plan to do to the northward when that golden spike is driven?

"I believe there may be a time when great hotels will rear themselves at Fort Churchill, the terminus, to accommodate the tourists who have sailed up the eastern coast along the fringe of Labrador, and through Hudson Strait; then on down through a bay that was once the roving ground of that romantic aggregation known as the Gentlemen of Adventure; at last to disembark and proceed home with the every comfort of most civilized travel."

The Hudson Bay line will be given a terminus at Churchill, but that will not be the end of the railway, says Sir Henry, "is never finished." It has to grow with the development it starts. Who dare predict the scope of the development that will gather wings to put to flight the little sweep that already has proved the northward is a region of riches? What has been revealed before the golden spike has been driven is barely a lifting of the curtain upon the great drama that will be played in the vast hinterland of Manitoba. Other prospects will not be denied their railroad accommodations. The terminus of next month will become the junction of many lines. "A railroad is never finished."

"The Hudson Bay line proves that," says Sir Henry. "For years people discussed whether the road could live, once it were built. There was the problem of whether the grain haulage would be sufficient for revenue. Now the road has been built and it can live if it never hauls a sack of grain. One of the great mineral fields of the world is up there; molten and rising, water power is being harnessed, millions are pouring into the country."

Driving the golden spike will not finish the Hudson Bay line. It will be the birth of the railroad that so practical a railroad as Sir Henry Thornton says is never finished. Manitoba Free Press.

Fish Meal Industry

C. Produced 14,000 Tons Of This Commodity Last Year

Last year British Columbia produced 14,000 tons of fish meal of which 1,600 tons were used in British Columbia for poultry feed. Seven thousand tons were exported to Germany, for dairy cattle feed chiefly; other exports were to California for poultry feed. The first exports of fish meal from British Columbia were to Japan, the product being used as a fertilizer.

"The total annual receipts of building societies in Great Britain are more than \$500,000,000."

Farmers Help Themselves

Establishing Grain Industry On a Sound Economic Basis

"While much is said in regard to the rapid development of Canadian industries very few people at the present time realize the tremendous efforts the farmers of Western Canada are making to establish the industry of grain growing on a sound economic basis and under full control of the growers themselves," says an article in the "Vancouver Sun" of June 15, 1929. "Every move made by the Pool is based on sound business principles, the object being to secure for the grain grower the last possible cent for his grain. The idea behind the Pool is centralized and continuous control of the grain delivered to the organization, which amounts to over half the total delivered to country elevators, and the members are devoted to the Pool, as they look upon it as being their sole hope of achieving a place in the scheme of things to which their toil entitles them."

Winnipeg Newspaper Union

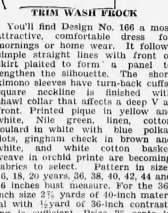

The Hudson Bay line proves that," says Sir Henry. "For years people discussed whether the road could live, once it were built. There was the problem of whether the grain haulage would be sufficient for revenue. Now the road has been built and it can live if it never hauls a sack of grain. Cost Of Rearing Draft Horses

Record Kept Of Cost Of Raising Thirteen Percheron Colts

One of the big problems that the farmers of many provinces will have to face for at least some years to come, is where the necessary draft horses may be purchased. Will they be good horses and the kind desired? How much will they cost?

With the object of throwing light on this question, cost studies have been made at the Ste. Anne de la Poudre Experimental Station since 1921. From that year to 1926, thirteen Percheron colts were raised to the age of two and one-half years. The weights of the colts, food consumed, and cost for each colt, was tabulated.

To grow these colts to working age, an average of 4,921 pounds of hay, 3,664 pounds of oats, 990 pounds of bran, and 7.7 months of pasture was required, at an average cost of \$14.67 per colt, weighing 1,517 pounds.

No mention is made of the service fee as this varies with the station used and district, nor has any charge been made of the mares having nursed these colts. At this station, as at many farms where colts are raised, the mares, as a rule, are, before giving birth to the colts, and after weaning, worked more than necessary to pay for their upkeep during the year. From the figures given above on the feed consumed by the thirteen colts reared in this five-year period, it will be seen that the average cost is 40 per cent. below the cost of draft horses of similar qualifications and weight in the open market. These experiments and many others appear in the annual reports of the experimental farms and stations, which may be had on application to the Publications Branch of the Department of Agriculture, at Ottawa.

Seven Cents For Cheese

Was Considered Good Price Half a Century Ago

A cheese factory account book of 1879, just half a century ago, is in the possession of Walter Stride, Cherry Valley, Ont. It shows that the highest price received for cheese that year was seven cents. For the month of July patrons received 33 cents per one hundred pounds of milk, just enough to buy the present-day farmer a gallon of gas to run his car.

To Discuss Young Plan

The conference to discuss the Young plan for settlement of the reparations problem, it is understood, will open August 6. No decision has yet been made as to the place of meeting.

Criticizes History Books

Says Canada's Part in the Great War Passed Over Lightly in Text Books

Public school history text books which have been adopted in several provinces of Canada, contain "19 words devoted to the part Canada played in the Great War," stated Dr. J. M. McDougall, formerly of Regina, Sask., now of Vancouver, B.C., national vice-president of the Joint Sons of Canada, in the course of an address before the eighth annual convention of that organization at Winnipeg.

"Such a condition of affairs in the education of our children is a colonial shame and national disgrace," he declared. The text books were published in the United States by Americans, said Dr. McDougall. Educational authorities, when asked for an explanation, had replied "that at the present time there is no one adequately equipped and willing to take the time to edit such a history," the speaker said.

Saskatoon Cattle Show

Breeders Well Satisfied With Prices That Prevailed

At the recent Saskatoon Cattle Show and Sale, good average prices were paid for bulls, thirty-eight head of Shorthorn bulls averaging \$170. Fifteen head of Shorthorn females averaged \$114, four Aberdeen Angus bulls averaged \$175, three Hereford bulls averaged \$158, and an aged Holstein bull sold for \$110. Quite a number of bulls, including both the Champion Aberdeen Angus and the Champion Hereford were bought by Saskatchewan Live Stock Branch, the buying being attended to by the Live Stock Commissioner. Many of the bulls were quite young but the breeders were well satisfied with the prices that prevailed.

Medicine Hat Air Port

Arrangements are under way to have an air port in Medicine Hat, said Dr. Gershaw, M.P., who recently returned from Ottawa where he has taken an active interest in the project. He understood that the line would link up Calgary and Camrose, Regina and Moose Jaw with Medicine Hat.

Canada's Mines Outlook

Practically all of the mines produced in Canada is of the amber variety (phlogopite). Mines in the Ottawa region, both in Ontario and Quebec, are the principal producers.

Cuba's most ancient city, Baracoa, is to be improved and embellished after hundreds of years of neglect.

National Research Council Will Endeavor To Solve Many Economic Problems

Rust Resisting Wheat

Three Varieties Of Wheat Which Will Withstand All Known Kinds of Rust

Two or three varieties of wheat which will resist rust have been developed by the department of agriculture. It was stated by Dr. J. H. Grisdale, deputy minister of the department. The experiments have been conducted for some years, but the stage has now been reached when it can be stated with considerable assurance that success is near at hand.

"Our experiments this year confirm the earlier prospects," said Dr. Grisdale. "No names have yet been given the new varieties and it will be two or three years before they can be produced in sufficient quantities for seed distribution, but we feel confident that we have the kind that will resist the known varieties of rust. It is to be remembered, however, that one rust will cross another and evolve a new kind, but the wheat grades discovered by careful research withstand them all. The annual damage done by rust is enormous, so the evolution of a wheat which will be unaffected by it is of incalculable advantage. In rust research we claim to lead the world."

Has Faith In Alberta's Gas Field

Engineer From Buffalo Predicts Province On Eve Of Oil Development

H. R. Davis, an engineer of Buffalo, N.Y., who has recently been making an inspection of the oil and gas fields in Alberta and Saskatchewan, predicts that the former is on the eve of a great development in natural gas production. He stated that it is his conviction that the surface has only been scratched, and that in the near future there will be an enormous development in the production of gas.

Origin Of The Word "Humbug"

Few people who use the word "humbug" so glibly, realize that it is a corruption of the name of a well-known German port. That year, when wars were common on the continent, so many false reports came from Hamburg that people used to say sarcastically, "That is humbug!" So "Hamburg" became corrupted into "humbug."

Lavas rarely flow as much as a mile an hour.

Riding on the Roof of the Rockies

ON THE SASKATCHEWAN GLACIER

LOOKING DOWN THE FRONT OF THE MOUNTAIN

WATERFALL NEAR CASTLEWARD

SHADOW LAKE UNDER THE SHADOW OF MT. BELL

Among the most spectacular of the Trail Rides ever attempted in the Canadian Rockies will be the one proposed to start August 8, and lasting 14 days, to take in a long distance ride to the Columbia Icefield from Lake Louise. This icefield is the largest body of glacial ice left on the North American continent, covering 150 square miles and surrounded by peaks from ten to twelve thousand feet in height. The ride will be from Lake Louise up the Bow Valley to Bow Lake, over Bow Pass

and by the Mistaya Valley past Waterfowl Lakes to the North Saskatchewan River, then up the Alexander River Valley to Castleward and the Columbia Icefield. Only Trail Riders holding at least the silver bullet emblematic of completion of 100 miles of trail riding will be permitted to join the expedition, since all taking part must satisfy the committee that they will not prove a burden to the rest of the party.

For less experienced Trail Riders,

British Columbia Bulbs

Sent To England To Be Planted In Old Country Parks

British Columbia bulbs, believed to be the equal to the best grown in Europe, will be planted in the public parks of England to encourage their importation into the Old Country, said Premier Tomin, the other day. He added that Sir William Clark, British High Commissioner in Canada, was much impressed with British Columbia flowers when on his recent visit and had suggested to the Lieutenant-Governor, that British Columbia bulbs might be exported to Britain to be planted and labelled, in the public parks.

Growing Up Of Water Power

The steady growth in the use of water power in Canada is shown by the facts that the average annual rate of increase in development since 1925 has been 16.7 per cent. and that the total development now amounts to 5574 installed turbine horse-power per 1,000 of population.

Close to 35,000 persons are employed in road construction in Canada each year.

"What has happened?"

"That cat scratched me."

"But what about all those wounds on your head?"

"The cat scratched me."

"But what about all those wounds on your head?"

"The cat scratched me."

"But what about all those wounds on your head?"

"The cat scratched me."

Thursday, Aug. 29, 1929

Next Monday, September 2,
is Labor Day, and a public hol-
iday.

Mr. and Mrs. T. Wallace, of
Strathmore, are the visitors of
Mr. and Mrs. W. R. Brodie.

Miss Vera Saunders returned
from a trip to Saskatoon, on
Saturday.

Miss Phyllis Tarr, left for
Calgary on Tuesday morning,
and will attend school there,
taking Grade XII.

Mr. and Mrs. N. Bassarah
and son returned from their
holiday vacation Wednesday,
and have taken up their resi-
dence in their new house.

Miss Maygold Conn and Miss
Myrtle Woods, of Ottawa, Ont.,
were the guests of Mr. and
Mrs. L. H. Shannon during the
past week enroute to Victoria.
Miss Conn is a niece of
Mr. Shannon.

The September meeting of
the Local Chapter of the
I.O.O.F. will be held on Tues-
day, September 3, at 3.30 p.m.
at the home of Mrs. D. Lusk.
As this will be the first meet-
ing after the summer holidays,
it is urged that every member
be present to take part in the
business of the organization.

Vis Saunders, left on a trip
to Regina, on Sunday.

Miss Greta Hanna left for
Calgary on Saturday, August
17.

Mr. Greer, of Gleichen, Alta.,
was the guest of Mr. and Mrs.
F. Sandercock, recently.

The Ladies' Aid will meet at
the home of Mrs. Reg. Poole,
on Thursday, September 5, at
3.30 p.m.

Mrs. Tarr, sr., is the guest of
her daughter-in-law, Mrs. M.
Tarr.

Mrs. W. L. West and Mrs.
W. Brander, from Regina, were
the guests of Mr. and Mrs. Fred
Montgomery for a few days.

Mr. and Mrs. Z. Livermore,
nurtured to Regina on Sunday
to attend the funeral of the
latter's mother. Sympathy is
expressed with Mrs. Livermore
in her bereavement.

Mrs. M. Sandercock and son,
Jack, made a trip to Fairmont,
Sask., recently, visiting friends
there.

Walter Northcott, returned
on Tuesday from a trip into
the Peace River country. Irwin
Tucker has shipped a threshing
outfit there and will engage in
custom Threshing. Walter
reports the crops as good.

Cricket is apparently increas-
ing in popularity in Canada
very rapidly. It is a good clean
sport and will most likely soon
be one of Canada's leading
games. It is England's national
game.

Mr. Edwin Clark Herr, of
Laurelton, Penn., U.S.A., was
the guest of Mr. and Mrs. L. H.
Shannon, over the week end.
Mr. Herr, one of the early set-
tlers in this district, is a brother
of Mrs. Shannon's.

Notice to Threshermen and Owners of Combines

Attention is drawn to the
amendment of the Noxious
Weeds Act. Notice cards as to
the provisions for clearing mach-
ines and wagon racks used
in conjunction must now be dis-
played in a conspicuous place
on both Threshing Machines
and Combines. Owners of any
such machines are required to
apply to the Secretary of the
Municipality for same unless
the one now on the machine is
clear and legible.

"In Selling Position"

Alberta Wheat Pool members should appreciate
what it means to the Central Selling Agency to
have Pool wheat in "a selling position."

To make the best sales Pool wheat should be in
a position where it is instantly available, and where
long and troublesome delays are not incurred.

When Pool wheat is in Pool elevators the Sell-
ing Agency can depend upon it being directed
whenever it is wanted. For that reason, it for no
other, Pool wheat should be delivered to Pool
elevators

Besides this, Pool elevators give Pool members
members an assurance of fair treatment to an
extent never known in the days when there was no
Wheat Pool.

You can best aid your Selling Agency and your
own elevator system by delivering your wheat to Pool
Elevators.

FUEGO OIL CO., LTD.

Office Address: Oyen, Alberta.

Shares are now selling at \$1 a share.

Good progress is now being made and the
indications are very promising. Good flows
of gas have been met with also oil showings.
It is a bona fide undertaking of promise near
to you, which you can visit. You are offered
an opportunity to co-operate.

Application blanks for shares may be obtained at

"The Alberta Wheat Pool
Expects Every Pool Member
Will Do His Duty."

If at all possible

Deliver All Pool Wheat To Pool Elevators

Pool elevators can handle Ninety Per Cent. of all
Pool Wheat.

With a short crop this year it is imperative that
Pool elevators should handle as much grain as possible.

Pool members' safety and the protection of the Six
Million Dollars invested in Pool facilities demands that
every possible bushel of Pool wheat that can be delivered
to a Pool elevator should go there.

[Two cents a bushel farm storage will be paid on
Pool wheat held on farms until December 2nd, 1929]
